

NIMHANS Triguna Scale Specification

Developer Integration Document • 30-Item Questionnaire, Scoring Engine & Content Mapping

ASSESSMENT ID	MODULE TARGET	TOTAL QUESTIONS
nimhans_triguna_30	Women's Well-being App	30 Items (10 per dimension)

1. Global Configuration & Options Key

Each item uses a standard 5-point Likert scale (Single Select). Response values map directly to integers 1 through 5.

Score Value	Label Description	Behavioral Context
1	Strongly Disagree / Never	Trait or behavior is absent in daily life
2	Disagree / Rarely	Occurs infrequently under specific conditions
3	Neutral / Sometimes	Moderate or variable frequency
4	Agree / Often	Regular and consistent characteristic
5	Strongly Agree / Always	Dominant and continuous behavior pattern

2. Complete Questionnaire (30 Items with Per-Item UI Options)

Each question displays the exact text, subscale dimension tag, and 5 selectable option buttons below.

Q01. I maintain a calm and steady mind even when facing unexpected challenges.

Often

5
Always

3. Scoring Engine & Computational Logic

Calculate raw subscores by summing selected values (1 to 5) for items tied to each dimension.

NIMHANS Triguna Scale • Developer Technical Spec

Page 4 of 7

1. Subscale Raw Calculations:

- **Sattva Score (S)** = Q01 + Q04 + Q07 + Q10 + Q13 + Q16 + Q19 + Q22 + Q25 + Q28 (Min: 10, Max: 50)
- **Rajas Score (R)** = Q02 + Q05 + Q08 + Q11 + Q14 + Q17 + Q20 + Q23 + Q26 + Q29 (Min: 10, Max: 50)
- **Tamas Score (T)** = Q03 + Q06 + Q09 + Q12 + Q15 + Q18 + Q21 + Q24 + Q27 + Q30 (Min: 10, Max: 50)
- **Total Raw Score** = S + R + T (Min: 30, Max: 150)

2. Relative Percentage Calculations (for UI Donut / Radar Charts):

- **Sattva %** = (S / Total Raw Score) × 100
- **Rajas %** = (R / Total Raw Score) × 100
- **Tamas %** = (T / Total Raw Score) × 100

4. Profile Interpretation & Recommendation Engine

Determine dominant trait profile using $\max(S, R, T)$ to render the primary result UI card and recommendation.

Dominant Profile	Trigger Condition	Result Headline	In-App Behavioral Guidance
Sattva Dominant	$S > R \text{ AND } S > T$	Balanced & Centered	High clarity, calm, and emotional resilience. Focus on sustaining this state through mindful daily routines, gentle movement, and creative activities.
Rajas Dominant	$R > S \text{ AND } R \geq T$	Active & Restless	Highly action-driven but prone to stress, anxiety, and burnout. Focus on grounding exercises, slow breathing techniques, and unplugging from work before bed.
Tamas Dominant	$T > S \text{ AND } T > R$	Inertial & Low Energy	Experiencing mental heaviness, low motivation, or fatigue. Focus on light physical activity, daylight exposure, dynamic movement, and low-effort habit building.
Dual Dominance	$S == R \text{ OR } R == T$	Dynamic Transition	Balancing contrasting energy patterns. Focus on stabilizing daily routines and monitoring sleep quality to reduce swings in mental energy.

5. Developer Schema Payload (JSON)

Use the JSON payload below to configure the frontend form rendering and backend subscale calculation array mapping.
